Terms of Use

The terms of use for this study can be found at:
<http://www.icpsr.umich.edu/web/ICPSR/studies/38417/terms>

Information about Copyrighted Content

Some instruments administered for studies archived with ICPSR may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE
WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR PROCESSING NOTES FOR #38417

*National Couples' Health and Time Study (NCHAT), United States, 2020-2021
DS 3: Public-Use Main Respondent Time Diary Data*

1. **Confidentiality/Disclosure Risk:** In order to protect respondent anonymity and prevent disclosure risk, ICPSR recoded many of the variables within the data. The disclosive information has been replaced with "MASKED BY ICPSR".
2. **Truncated Value Labels:** Due to statistical limitations, the value label for value 3 in variables **Q1A** and **Q1**, and the value label for value 4 in **Q6** are truncated in the data. Please refer to the P.I. documentation for full value labels.
3. **Truncated Variable Label:** Due to statistical limitations, the variable label for the variable **Q24** is truncated in the data. Please refer to the P.I. documentation for full variable labels.
4. **Symbols Present in the Data:** There are several variables in the data that include symbols such as '{e://Field/HM3}'. These symbols refer to response options that were displayed based on the household members associated.
5. **Variable Explanations:** Several variables in the data have field references in the variable label. For example, the variable **Q7_1_1** has the label of "Who was there while you were [Field-3]?" These field references are referring to previous responses in the survey. For example, Field-1 and Field-3 are responses which were selected from **Q1**.
6. **Additional Information:** For additional information on the National Couples' Health and Time Study (NCHAT), please visit the [National Couples' Health and Time Study \(NCHAT\)](#) website.

National Couples' Health and Time Study (NCHAT), United States, 2020-2021

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
